SKILLS

- **Languages:** Proficient in English and in Chinese (Mandarin)
- **Programming Languages:** HTML, CSS, PHP, jQuery, JavaScript, Python, C#, SQL Server
- **Software/Tools:** .Net, SSMS, Redis, FastAPI, AWS, GCP, NodeJS, React, NextJS

WORK EXPERIENCE

Software Analyst | St Clair Pte Ltd Jan 2026 – May 2026

- Built a python stock screener to visualise the correlation between multiple financial metrics across 500 tickers, highlighting trade ideas
- Automated daily API calls, web scraping and data storage via GitHub Actions, maintaining an uninterrupted time-series dataset
- Parallelised ticker processing with multithreading and sharded SQLite databases with price data, improving runtime by 80%

Full Stack Developer | Transcentech Pte Ltd Jan 2024 – Oct 2024

- Enhanced and maintained internal .Net web applications, hosted on IIS with SQL Server backends
- Identified database bottlenecks and refactored stored procedures to only fetch required data, improving response times by 25%
- Wrote unit tests, ran code analysis with SonarQube and passed penetration tests before deployment

Technical Content Writer | Envision Digital Jan 2022 – May 2022

- Automated the daily summarisation of internal forum posts using Power Automate and Excel Scripts, saving the team 1 hour per day

PERSONAL PROJECTS

Concession Fare Checker 2026

- Parsed SimplyGo's monthly PDF statement for journey details, matching bus stop descriptions with codes fetched from LTA DataMall
- Calculated travel fares by estimating distances between bus stops using coordinates, and an open-source rail dataset for track distances between train stations

soaptest 2026

- Published a python package to PyPI for testing SOAP APIs, skipping raw XML and boilerplates
- Automated integration tests and version tag matching with GitHub actions, avoiding broken releases
- Exposed all WSDL operations as functions with the required parameters, simplifying tests with pytest

Candlestick Matcher 2025

- Prototyped a candlestick pattern matcher using ResNet18, comparing vector embeddings and cosine similarity
- Implemented a sliding window to capture patches of an uploaded image for localised comparisons
- Processed uploaded charts with OpenCV to determine the window's size and stride

Crochet Diagram Generator 2025

- Generated crochet diagrams from text instructions using Konva
- Built in HTML and fully client sided to keep user data local and enable embedding into WordPress

EDUCATION

Nanyang Technological University Aug 2019 – May 2023

- School of Electrical and Electronic Engineering
- Bachelor of Engineering (Information Engineering and Media)
