

SKILLS

- **Languages:** Proficient in English and in Chinese (Mandarin)
- **Programming Languages:** HTML, CSS, PHP, jQuery, JavaScript, Python, C#, SQL Server
- **Software/Tools:** .Net, SSMS, Redis, FastAPI, AWS, GCP, NodeJS, React, NextJS, Claude

WORK EXPERIENCE

Software Analyst | St Clair Pte Ltd Jan 2026 – May 2026

- Built automated pipelines to conduct fundamental analysis between competitors, lending confidence to trade ideas
- Tracked options data to expose market dealer behaviour, guiding risk management and position sizing
- Developed a trading algorithm using measured moves, providing price targets and stop losses

Full Stack Developer | Transcentech Pte Ltd Jan 2024 – Oct 2024

- Developed web applications in .Net and hosted them on IIS, maintaining databases in SSMS
- Identified bottlenecks and optimised stored procedures, shortening rendering times by 10%
- Conducted code reviews with SonarQube and satisfied WAPT before deploying to production

PERSONAL PROJECTS

Concession Fare Checker 2026

- Developed a fare checker to calculate the travel fares for journeys paid with concession
- Parsed SimplyGo's monthly PDF statement for journey details, matching bus stop descriptions with codes fetched from LTA DataMall
- Estimated travel distances between bus stops using coordinates, and sgraildata for track distances between train stations

soaptest 2026

- Released a python package for testing SOAP APIs, skipping raw XML and boilerplates
- Exposed all WDSL operations as functions with the required parameters, simplifying tests with pytest
- Automated CI tests and version tag matching with github actions, avoiding broken releases

JSON Editor 2026

- Created a drag and drop JSON restructure tool
- Restructures all leaves simultaneously, allowing quick swaps among depths and key-value pairs

Candlestick Matcher 2025

- Attempted to identify candlestick patterns using vector embeddings and cosine similarity
- Implemented a sliding window to capture patches of an uploaded image for localised comparisons
- Processed uploaded charts with OpenCV to determine the window's size and stride

Crochet Diagram Generator 2025

- Generated crochet diagrams from text instructions using Konva
- Designed to be fully client sides for data privacy and storage concerns, simplifying integration requirements for Wordpress

EDUCATION

Nanyang Technological University Aug 2019 – May 2023

- School of Electrical and Electronic Engineering
- Bachelor of Engineering (Information Engineering and Media)
